Founder's Message

With a collective experience of over 40 years in the industry, the three of us—co-founders of AI Linc—are driven by one shared mission:
To empower 1 million users globally through quality AI education.

AI is no longer the future — it's now. And yet, access to AI knowledge remains limited. At AI Linc, we are bridging this gap by building a global AI workforce that's skilled, future-ready, and inclusive.

From beginners to professionals, our programs, tools, and learning resources are designed to make AI simple, practical, and accessible to all.

We invite you to be part of this revolution.
Let's unlock the power of AI — together.

— Founders, AI Linc

About Us

Our Vision

To empower every learner and professional to become AI-ready, driving innovation, productivity, and purposeful impact across industries.

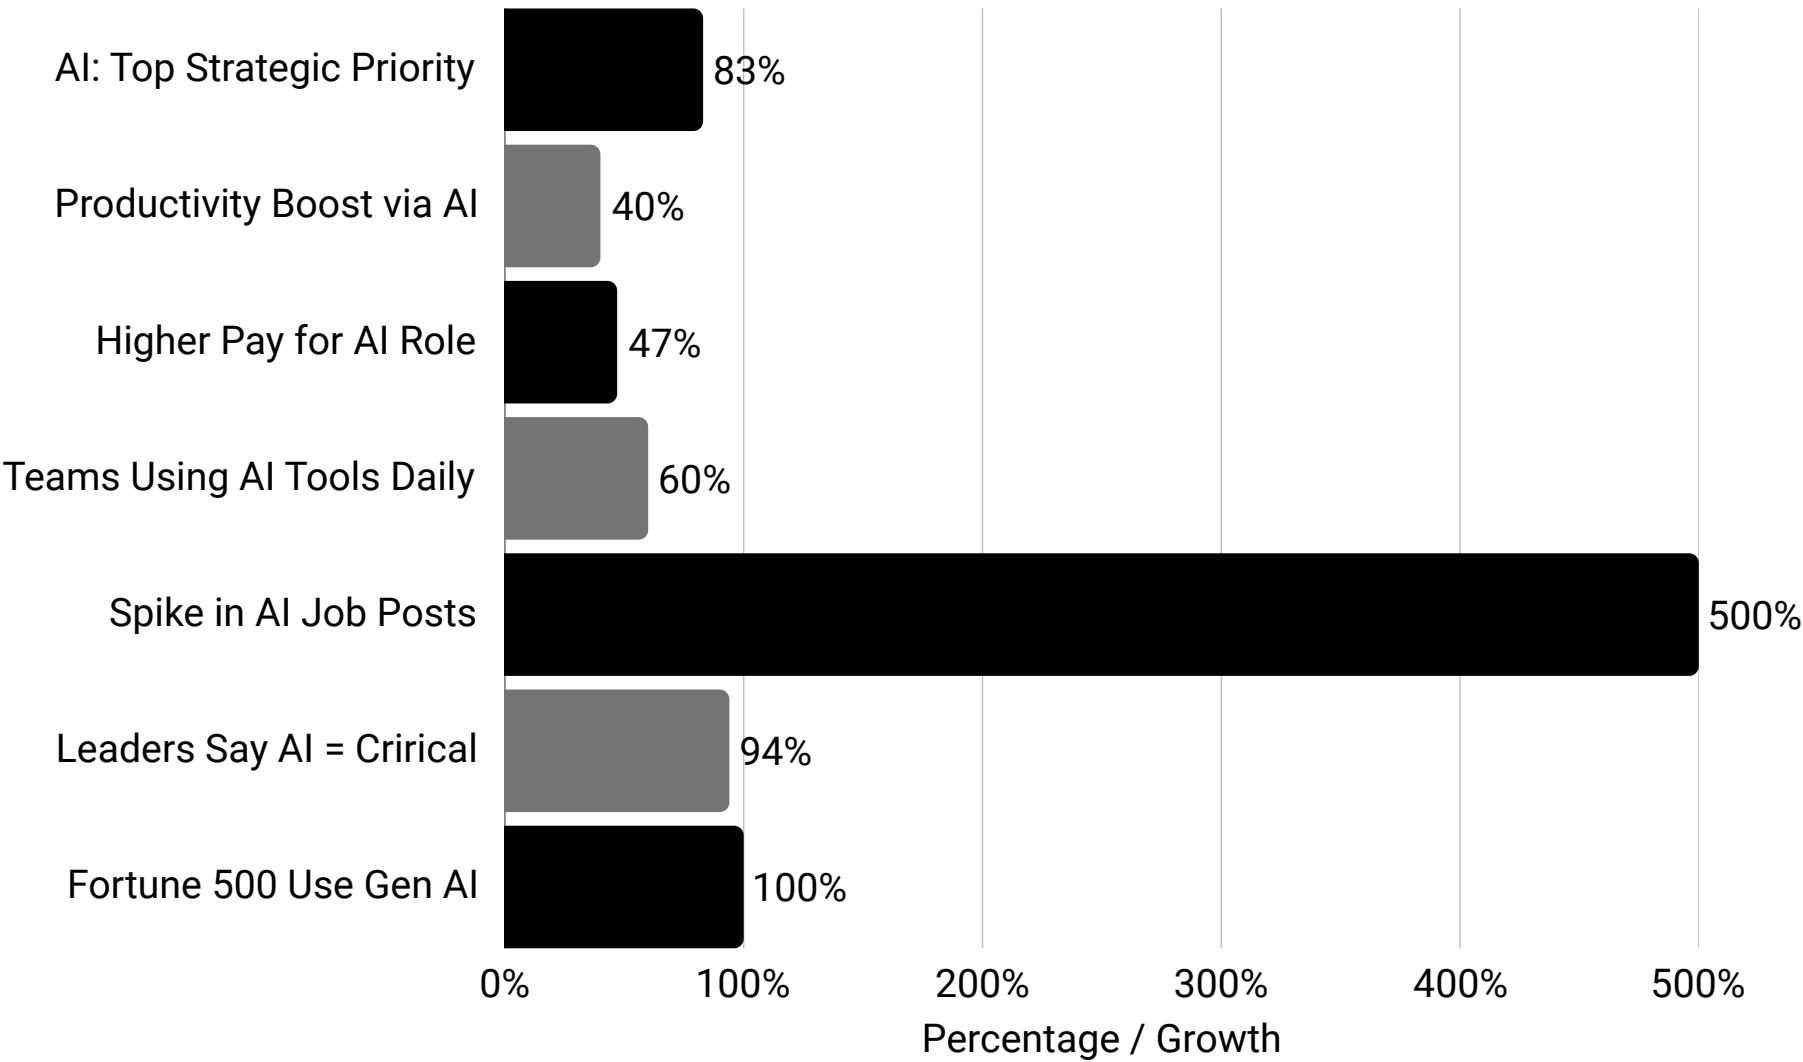

Our Mission

To democratize access to real-world AI education through hands-on training, global mentorship, and job-ready programs.

We enable individuals to master AI tools, unlock career growth, and lead in the age of intelligence, making AI education accessible and impactful for everyone.

Why AI is Essential in Every Field

The world is rapidly transforming with Artificial Intelligence at its core. AI is not just a technological trend; it's a fundamental shift reshaping how we work, hire, create, automate, and grow.

This program teaches you to use AI, build with AI, and get paid because of AI, positioning you at the forefront of this revolution.

Who Will Benefit from This Program?

Our comprehensive AI program is meticulously designed to cater to a diverse audience, empowering individuals at every stage of their professional journey.

Working Professionals

Upskill and integrate AI into current roles for enhanced productivity.

Job Switchers

Seamlessly transition into high-demand AI and tech roles.

Job Seekers

Gain a competitive edge in the job market with AI proficiency.

Entrepreneurs

Leverage AI to innovate and scale new business ventures.

Businesses

Equip teams with AI skills for strategic growth and efficiency.

Freshers

Lay a strong foundation for a future-proof career in AI.

Whether you're looking to advance your career, pivot into a new field, or integrate AI into your business, this program offers tailored pathways to success.

Achieve Tangible Outcomes with AI

Our program is designed to equip you with practical AI skills, translating directly into career growth and enhanced earning potential.

1

Become AI-Ready Across Domains

Master AI concepts applicable to various industries and job functions.

2

Build Real AI Projects

Develop a robust portfolio with practical projects in web, app, automation, and data analysis.

3

Crack High-Paying Roles

Secure lucrative positions across business, tech, and strategy sectors.

4

Achieve Faster Career Growth

Accelerate your professional trajectory with in-demand AI expertise.

5

Better Salary Offers

Command higher compensation packages through specialized AI skills.

Your Journey to AI Mastery

1 Duration & Flexibility

A 6-month intensive program, constantly upgraded to align with the latest AI trends. Enjoy live weekend sessions and access to 100+ hours of expert-led content via recordings.

2 Project-Based Learning

Complete 36 individual projects after each major skill module and 5 capstone projects for a real-world AI portfolio.

3 Comprehensive Support

Gain access to 20+ high-impact resources and 24x7 bot-powered support for immediate query resolution.

Our program blends flexibility with rigorous, practical training to ensure you gain job-ready AI skills.

Placement & Career Support

We are committed to your success beyond the classroom, providing extensive support to help you secure your dream AI role.

1:1 Mentorship

Receive personalized guidance from industry experts after completing the career phase.

ATS-Friendly Resume Preparation

Craft compelling resumes optimized to pass Applicant Tracking Systems and impress recruiters.

Our dedicated career support ensures you are fully prepared to land high-paying, impactful roles in the AI industry.

Portfolio Building

Develop a robust portfolio showcasing your real-world AI projects and capabilities.

Personalized Mock Interviews

Practice and refine your interview skills with tailored mock sessions and constructive feedback.

Upskill in AI: What do we bring on the table ?

Accelerate Your Career Growth. Unlock your potential with our comprehensive AI curriculum designed to propel your career forward.

Our 6-Month Curriculum Roadmap

Our intensive 6-month roadmap is structured to provide deep dives into key AI domains, with each module dedicating 21 days to focused learning and practical application.

1

Foundations & Productivity

2

Data & Business Analysis

3

Software Dev & Testing

4

Agentic AI & Automation

5

Career Readiness & Leadership

6

Business Applications

7

Core Data Science & Gen AI

Module 1: Foundations of AI & Everyday Productivity

Generative AI Concepts

Understand the core principles and models behind Generative AI.

AI Productivity Tools

Leverage AI for efficient research and daily tasks.

Prompt Engineering Mastery

Learn to craft effective prompts for diverse AI applications.

LinkedIn & Personal Branding

Optimize your professional presence for the AI era.

Module 2: AI-Powered Data & Business Analysis

AI-Enhanced Data Tools

Master PPT, Excel, and Power BI integration with AI for smarter analysis.

SQL & Python with AI

Utilize AI to streamline your SQL queries and Python scripting for data manipulation.

EDA & Feature Engineering

Apply AI techniques for Exploratory Data Analysis and effective feature engineering.

Module 1: AI Tools you can learn

Veo 3

Text-to-video generation for slide decks, marketing, or intros.

PromptBase / PromptChainer

Marketplaces and tools to source, chain, and refine prompts for better results

Perplexity / DeepSeek

AI research assistants that answer complex queries with citations, real-time data support

ChatGPT / GPT-4 / Claude / Gemini

Large LLM chatbots for drafting content, answering questions, brainstorming, explaining concepts—widely used for productivity and writing support.

PromptLayer

A prompt-engineering platform to manage and version your prompts, test variations, track performance across models

Motion (UseMotion)

AI scheduler and task manager that plans your day intelligently

Notion AI / Microsoft Copilot in Office 365

Turn plain prompts into polished documents, slides, spreadsheet analyses, and more.

Grammarly AI

Helps write, edit, and refine your writing, including a cover-letter generator

Midjourney / DALL·E / Stable Diffusion

Text-to-image generative tools for visuals and creative ideation

Riffusion

Music generation from text/spectrogram ideas—ideal for creative projects or learning content accompaniment.

Plaud NotePin

Wearable AI dictation/transcription device to capture ideas hands-free.

Module 2: AI Tools you can learn

Julius AI

AI-powered assistant for exploratory data analysis; chat with data, visualize, build models with minimal coding

Power BI (with Copilot)

Microsoft's BI tool enhanced with AI for automated charts, Q&A insights, narrative summaries

CTableau (with AI features)

AI-driven dashboards and data prep with Ask Data and Explain Data features.

Quadratic AI

AI service tailored to business reporting and data analysis automation.

Polynomial tools like Domo, Sisense, MonkeyLearn

Platforms with AI-augmented analytics and predictive insights.

BigQuery + Vertex AI

Google's cloud SQL + AI integration allowing predictive modeling from SQL queries directly.

GDatabricks (with AutoML)

AI-enhanced notebooks for model creation, EDA, and scalable feature engineering

KNIME

Visual workflows with built-in AI nodes for analytics, feature engineering.

Deepnote

Cloud notebook for combining SQL, Python, AI models and collaboration in one environment.

Deepnote

Cloud notebook for combining SQL, Python, AI models and collaboration in one environment.

Module 3: AI-Powered Software Development & Testing

Learn to build and rigorously test software using cutting-edge AI methodologies.

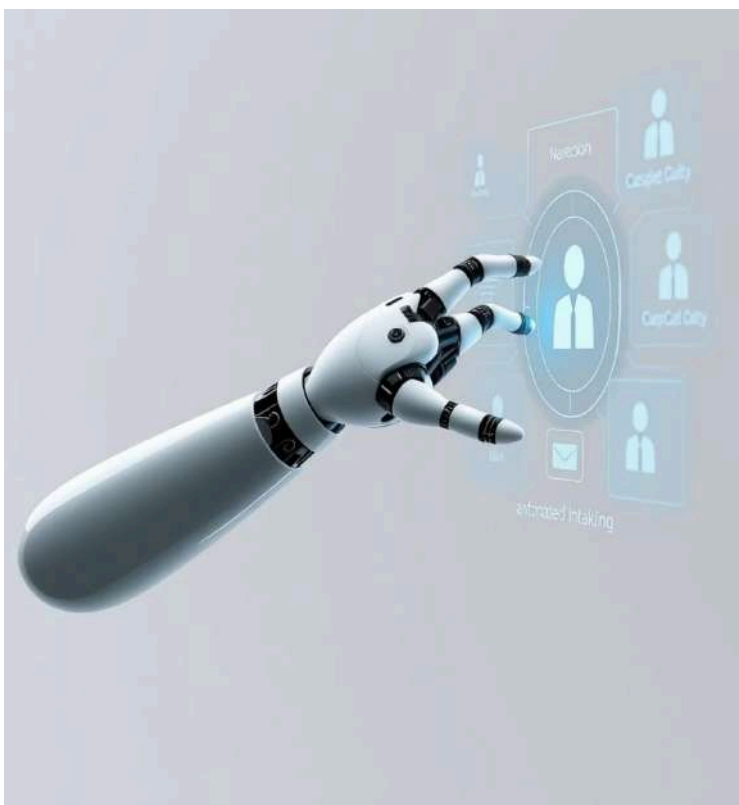

Web & App Development from Prompts

Generate functional web and mobile applications directly from natural language prompts.

AI-Driven Software Testing & Automation

Implement AI for automated testing, bug detection, and quality assurance.

Module 4: Agentic AI & Automation Strategies

Delve into the world of autonomous AI agents and intelligent automation, transforming business workflows.

- **LangChain & RAG Bots:** Build powerful conversational agents with retrieval-augmented generation.
- **Crew AI & No-Code Apps:** Develop multi-agent systems and create applications without extensive coding.
- **Multi-Agent Business Workflows:** Design and implement AI systems that collaborate to automate complex tasks.

Module 3: AI Tools you can learn

GitHub Copilot

Autocomplete AI paired with IDEs for code generation, suggestions across languages.

Cursor / Tabnine / Amazon CodeWhisperer

AI coding assistants offering contextual suggestions, code completion, and style guidance.

GitHub Copilot Reviewer / CodeRabbit / Cursor BugBot

Automated code-review bots integrated into CI/CD pipelines.

OpenAI Codex / GPT-4.1-based coding tools

Advanced LLMs focused on code reasoning and synthesis across languages.

Amazon Kiro (beta)

Agentic tool for real-time code generation, optimization, issue detection using multi-modal inputs.

Reflection AI / Graphite / Greptile

Emerging agentic dev tools automating backlog, test generation, code submission.

Zencoder Zen Agents / Claude Code

Full-lifecycle AI agents managing code, reviews, tests, deployment.

Testsigma

Generative AI-powered codeless automation testing platform using natural language scripts.

testRigor

Convert English into executable test scripts and automate quality assurance workflows.

Mabl

AI-native automated testing across web, mobile, API and performance testing.

Module 4: AI Tools you can learn

LangChain

Developer-first toolkit for building retrieval-augmented generation (RAG) agents and pipelines.

CrewAI

Multi-agent orchestration framework for role-based agent workflows and business automation.

AutoGen

Framework for building autonomous agent systems using LLMs, managing conversations and task delegation.

Lindy ai

No-code agentic AI platform appealing to non-developers building multi-agent workflows.

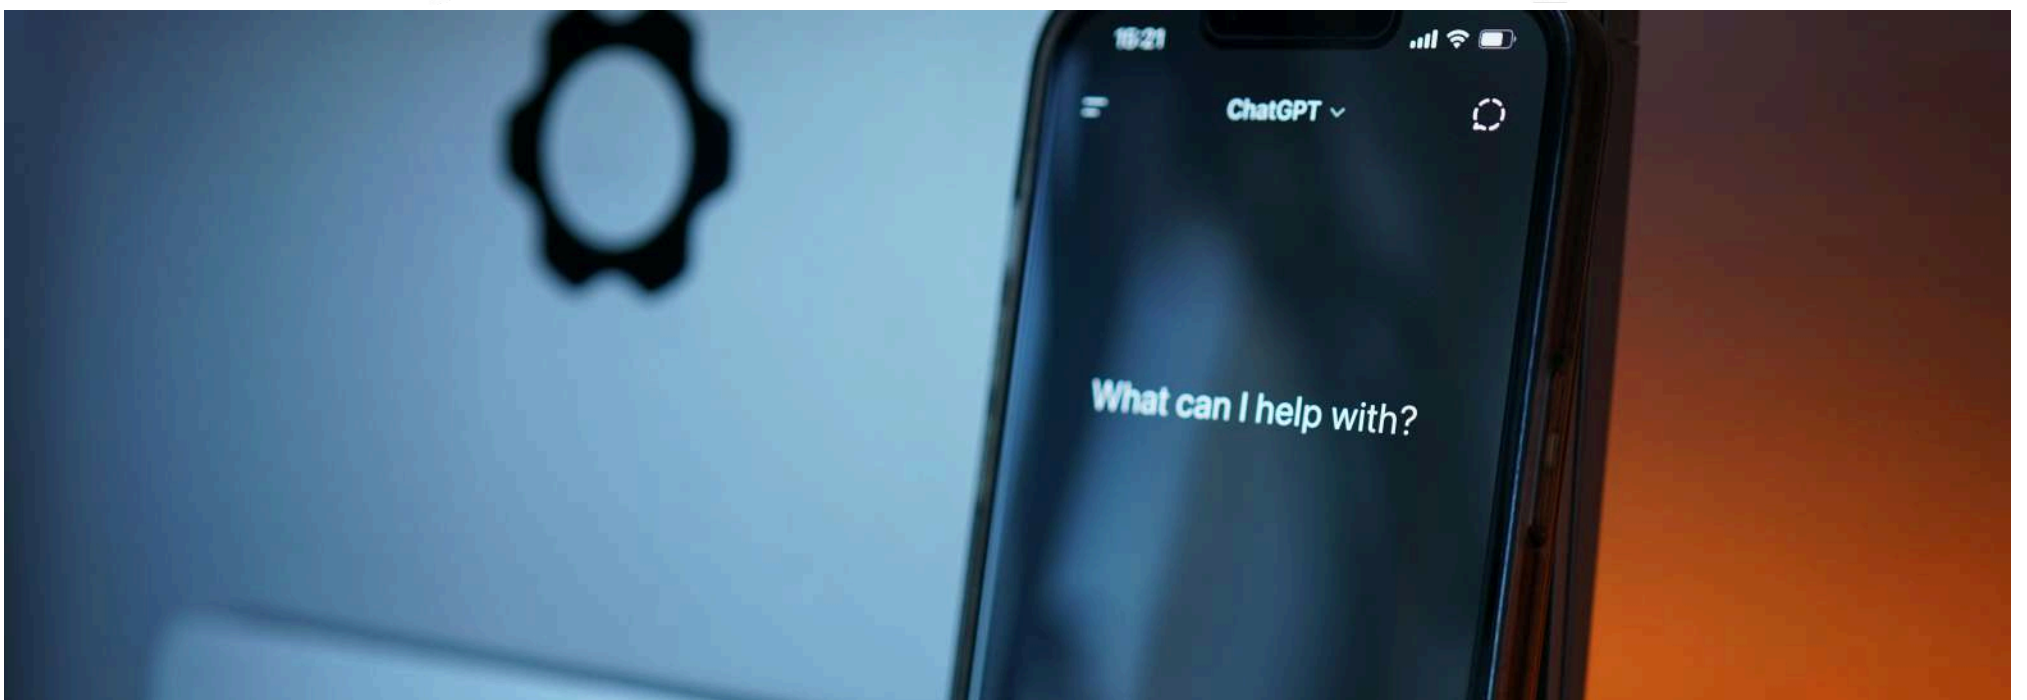

AgentFlow / Pydantic AI

Additional frameworks for structured agent architectures and automation scaling.

Flowhunt

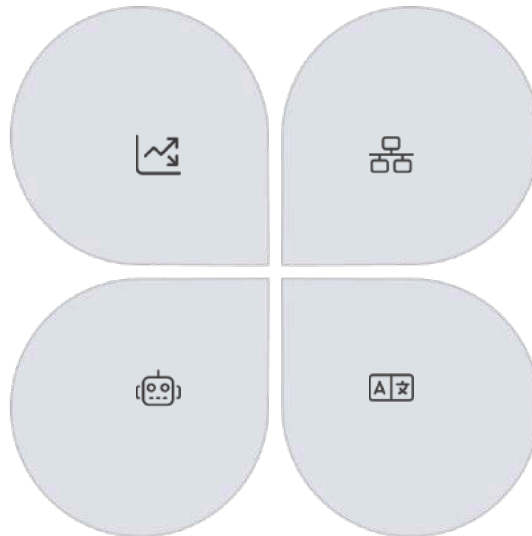

Comparative guidance for choosing between CrewAI and LangChain, useful for design decisions.

Module 5: Core Data Science & Gen AI Skills

Machine Learning Use-Cases

Explore practical applications of ML algorithms.

Deep Learning Architectures

Understand neural networks and deep learning models.

Generative AI Deep Dive

In-depth exploration of advanced generative models.

Natural Language Processing

Dive into text analysis and understanding with AI.

Module 6: Business Applications of AI

Discover how AI is transforming various industries and business functions.

- Product Management
- Supply Chain Optimization
- Marketing & Sales Enablement
- Legal Tech Innovation
- Cybersecurity Enhancements
- Responsible AI Implementation

Module 5: AI Tools you can learn

OpenAI GPT-4 / Claude 4 / Gemini

Advanced large models for text, code, and multimodal generative tasks.

Hugging Face Hub

Access to numerous pretrained models and fine-tuning pipelines.

TensorFlow / PyTorch + AutoML tools

Build and experiment with deep learning architectures.

Runway ML / DreamStudio / Midjourney

Generative platforms for image, video, and multimedia creation.

Rasa / spaCy / Hugging Face NLP tools

NLP-focused libraries for classification, entity recognition, chatbots.

Weights & Biases / Comet

Experiment tracking, model evaluation, monitoring for ML workflows.

LangChain/OpenAI integrations for RAG-based deep NLP apps.

Module 6: AI Tools you can learn

Grammarly Business / Jasper

Marketing content personalization, sales email drafting, customer engagement.

HubSpot AI / Salesforce Einstein

AI modules for marketing automation, CRM insights, recommendation.

Supply chain platforms with AI (e.g. Llamasoft, ClearMetal)

Demand forecasting, route optimization.

Legal-tech AI such as Evisort, LawGeex

Automated contract review, compliance check.

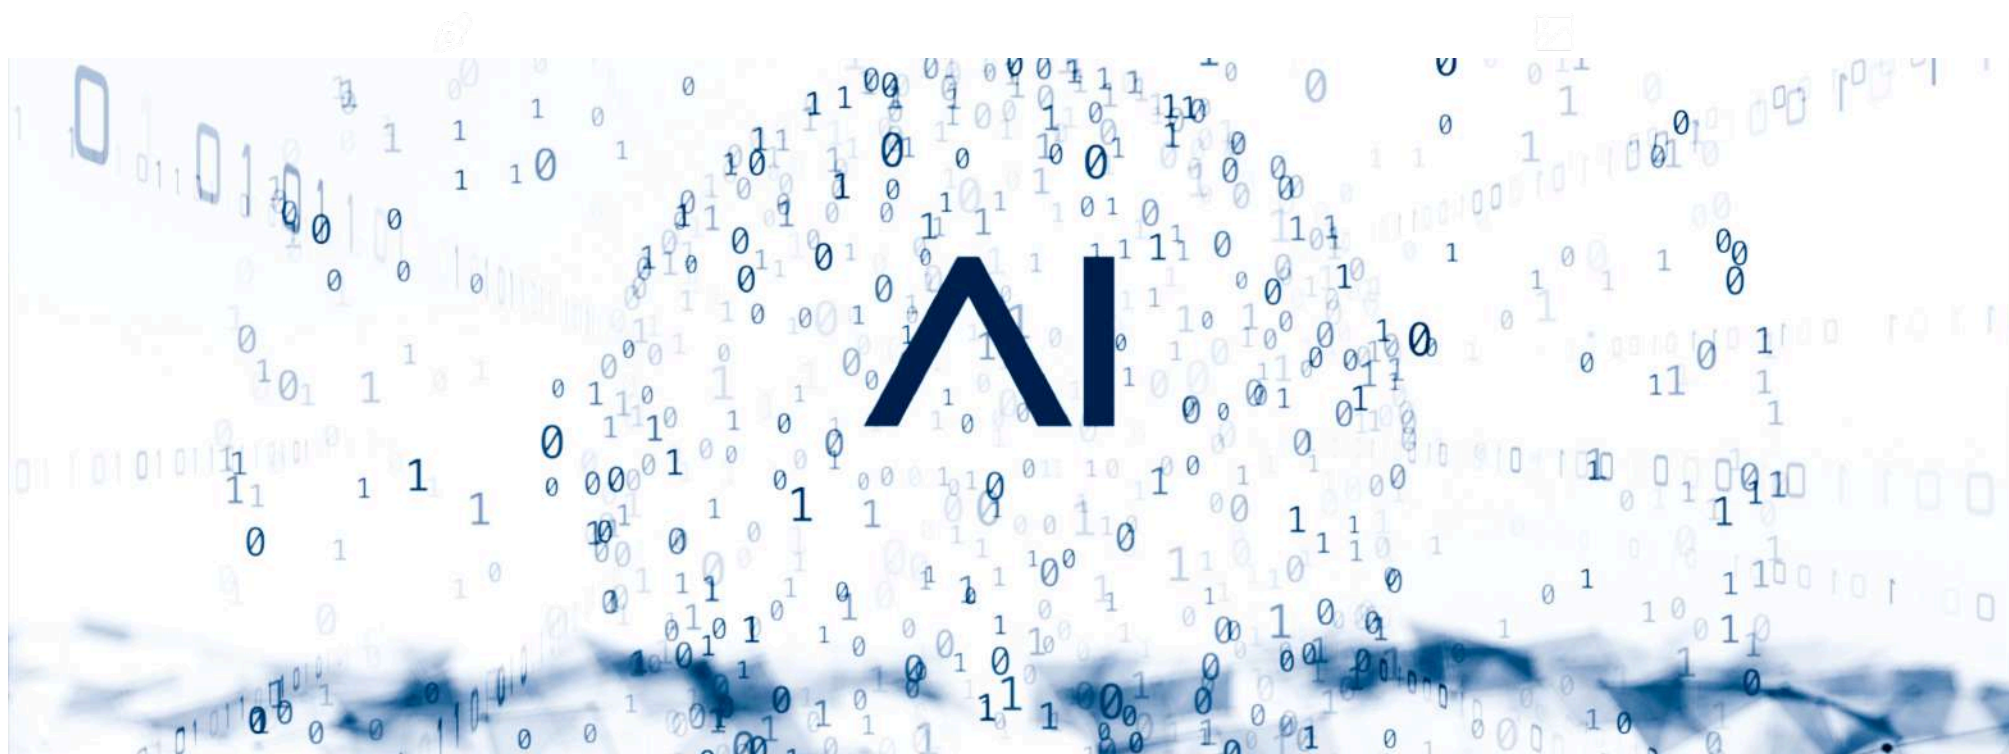

Darktrace / CrowdStrike AI

AI-powered cybersecurity threat detection and response.

Akkio / MonkeyLearn / Domo

Analytical tools applied across product management, finance, marketing tasks.

Module 7: AI-Powered Career Advancement Strategies

AI-Written Cover Letters & LinkedIn Branding

Generate compelling cover letters and optimize your LinkedIn profile.

AI for Job Search & Resumes

Leverage AI to identify opportunities and create ATS-proof resumes.

Recruiter Outreach & 40% Hike Strategy

Develop effective outreach strategies to achieve significant salary growth.

Mock Interviews & Salary Negotiation

Practice with AI-powered simulations and master negotiation tactics.

Module 7: AI Tools you can learn

Kickresume AI

GPT-4 powered tool to generate cover letters and initial drafts quickly.

Grammarly Cover Letter Generator

Quick, polished output from resume + job title input.

Teal (cover-letter tool)

Tailored letters built from job description + resume input.

AIApply

End-to-end job-search platform: resume builder, cover-letter, auto-apply, interview practice.

Careerflow.ai

Resume builder with ATS-optimization and keyword tuning for roles.

Final Round AI / Sonara / AutoJob / Jobflow

Platforms that automate job matching, resume customization, follow-ups, even interview scheduling.

What makes us stand out ?

AiLinc blends real-world AI training with 100+ practical tools, no-code learning, live sessions, and global certifications from IBM, Microsoft, and more. With simulations guided by MAANG experts, strong placement support, and a money-back guarantee, we ensure every learner becomes job-ready. Our programs evolve with industry trends and offer lifetime access, making AiLinc a one-stop platform to master AI—whether you're from tech or non-tech background.

Mastering AI - Across Domains

Our comprehensive programme is designed to equip you with cutting-edge AI skills across various critical business functions.

AI in Development

Building and deploying intelligent systems, from foundational models to production-ready applications.

Data Science & Analysis

Harnessing data for insights, predictive modelling, and informed decision-making using AI algorithms.

Business & Product Management

Strategizing and implementing AI solutions to drive business growth and innovative product development.

Supply Chain & Cybersecurity

Optimizing logistics with AI and safeguarding digital assets through advanced AI-driven security protocols.

Practical Application: Work Experience & Domain Focus

Gain hands-on experience and specialized knowledge that bridges the gap between theory and practice.

1

21-Days For Each Domain

Each domain receives dedicated focus for 21 days, ensuring thorough mastery and practical application of AI within that specific area.

2

Optional Work Experience Simulations

Collaborate on realistic AI projects with Product Managers from top MAANG companies, gaining invaluable hands-on experience and mentorship.

Interactive Learning: Live Sessions & Doubt Clearing

Our programme ensures an interactive and supportive learning environment to help you grasp complex AI concepts.

Weekend Live Sessions

Engage with industry experts in dynamic, interactive sessions every weekend. Deep dive into practical applications and real-world case studies, enhancing your understanding and retention.

Dedicated Doubt Clearing

Get your queries resolved promptly with our dedicated doubt-clearing sessions, running Monday to Friday at 9 PM. Ensure no concept remains unclear.

AI Tool Mastery: Boost Your Efficiency

Discover and master a vast array of AI tools that will multiply your productivity and streamline your workflows.

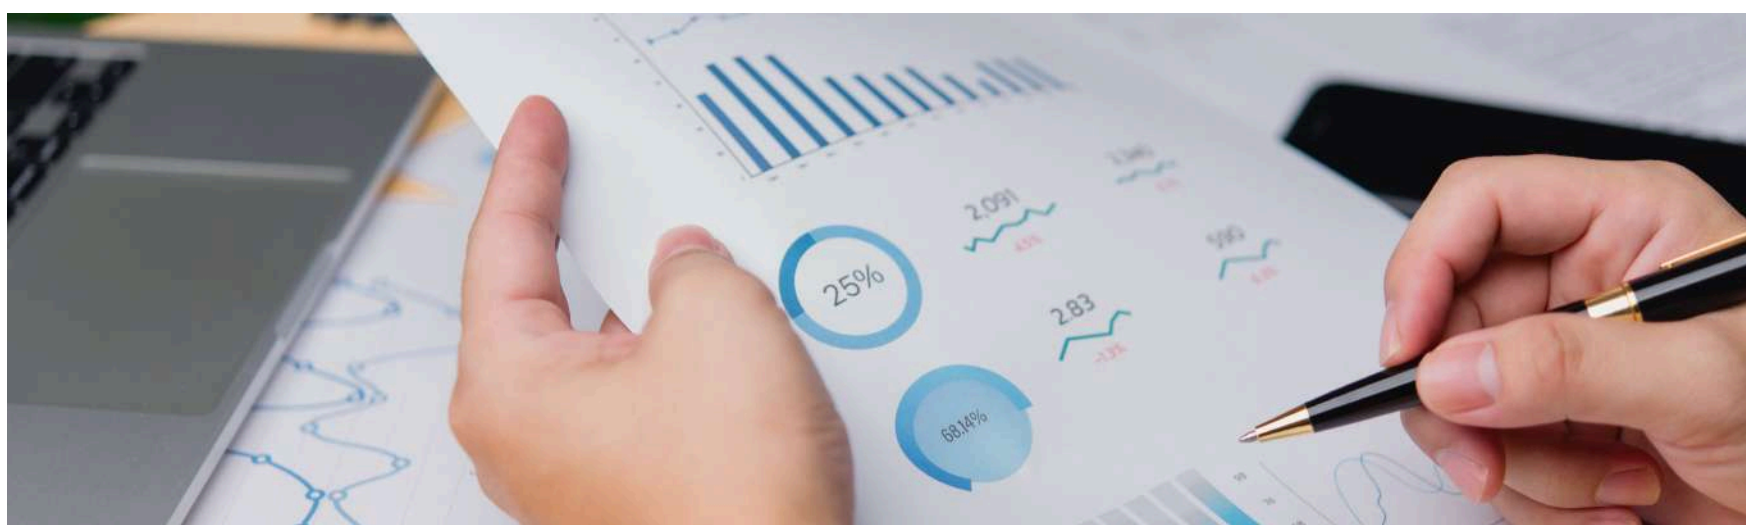

100+ AI Tools for 100x Efficiency

Explore a curated collection of over 100 AI tools designed to automate tasks and significantly boost your productivity.

Automated Reports

Strength & Gaps Analysis

Receive automated email reports detailing your strengths and areas for improvement, ensuring continuous growth.

Expert Insights & Community Engagement

Connect with AI luminaries and join a vibrant global community to stay ahead in the industry.

Benefit from direct access to leading minds in Artificial Intelligence, gaining unparalleled insights and networking opportunities.

Weekly Sync-ups

Engage in weekly sync-ups with AI Industry Leaders, gaining direct insights and mentorship.

Global Event Access

Receive entry passes to exclusive AI Community Global Events, expanding your network.

Career Advancement & Placement Support

We are committed to your success beyond the classroom, offering robust support for your career progression.

Access to Career Fairs

Gain exclusive access to premier career fairs and recruitment drives, connecting you directly with potential employers.

Personalised Support

Benefit from dedicated placement assistance, including resume building, interview preparation, and job matching.

Unparalleled Guarantee: Your Success, Our Commitment

We stand by the quality of our programme with an industry-leading financial guarantee.

100% Money-Back Guarantee

If you don't secure a job within a year of completing our programme, we offer a full refund. Your investment is protected.

Salary Hike Guarantee

We guarantee a salary increase upon successful job placement after completing our programme.

Continuous Growth: Lifetime Access & Future-Proofing

Your learning journey with us extends indefinitely, ensuring you always have access to the latest in AI.

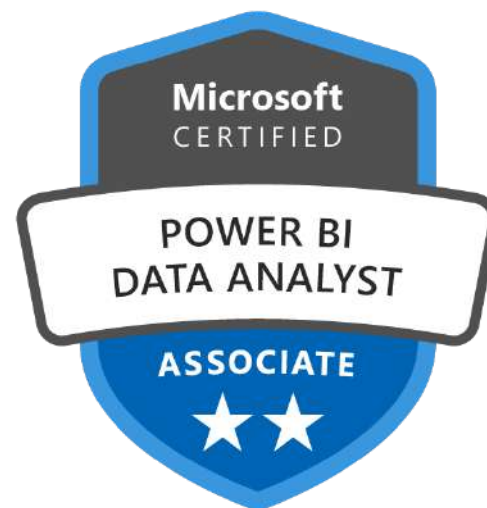

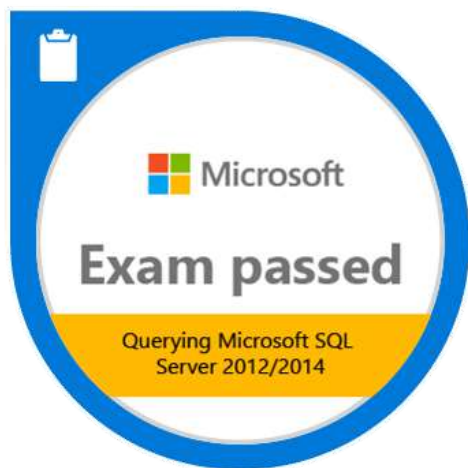

Lifetime Platform Access

Enjoy permanent access to our platform, including all future content updates, new AI tools, and evolving curriculum. Stay at the forefront of AI innovation without additional costs.

This commitment ensures that as the AI landscape evolves, your skills and knowledge remain current and competitive, empowering you for a sustained and successful career.

Excited to Share My Learning Journey!

I'm thrilled to announce that I've successfully completed the AI Assessment conducted by **AI Linc**, earning a certificate for the No-Code Development Bootcamp focused on Agentic & Generative AI.

This transformative bootcamp provided hands-on experience in building powerful applications using no-code tools and AI agents, guided by expert-led sessions from **Microsoft**, **Google**, and **Amazon**.

This experience has further fueled my passion for AI and innovation, and I'm eager to continue exploring the evolving landscape of Generative AI and Agentic systems.

Thank you **AI Linc** and mentors from **Microsoft**, **Google**, and **Amazon** for an inspiring and insightful AI bootcamp!

Excited to share that I've completed the "No Code Development Bootcamp using Agentic/Generative AI" by **AI Linc**!

It was an eye-opening, hands-on experience where I learned to built real-time websites using Cursor AI — no full-stack background needed.

Big thanks to **Shubham Lal**, **Poorva Shrivastava Munoth** and entire **AI Linc** team for such an impactful session.

Just completed an insightful @AI-LINC Company Webinar and received my Certificate of Completion! This wasn't just another online session — it was a deep dive into how AI is reshaping industries, decision-making, and the future of work. The assessment at the end truly tested my understanding, and I'm proud to have passed it. What stood out most was the real-world relevance and clarity in explaining complex AI concepts. Huge thanks to the **AI Linc** team for organizing such a valuable learning experience.

Continuous learning never stops — and this was a powerful step forward in my AI journey.

100+ Sessions Delivered

Live Program

Includes All 19 Lifetime Learnings Plus:

AI Career Accelerator (Inner Circle)	Rs. 40,000 Free
Your Own AI Assistants	Priceless
36 INDUSTRIAL Projects	Rs. 30,000 Free
Python Using AI Mastery	Rs. 15,000 Free
Basic to Advanced Tableau Masterclass	Rs. 7,000 Free
Generative AI Mastery	Rs. 8,000 Free
AI for Freelancing & Business Owners	Rs. 7,000 Free
4 Day Financial Freedom Accelerator	Rs. 7,000 Free
Interview & Resume Cracking Masterclass	Rs. 6,000 Free

Total Value:	Rs. 1,20,000/-
---------------------	-----------------------

Fees Structure:

Total Amount : Rs. 1,20,000/-

Offer Price : 28,000 (First come first serve basis, Applicable for 20 seats only)

Booking fees: Rs. 499/- only (**refundable within 7 days**)
 Monthly No cost Instalments Available

FAQs

I work 9-to-6—can I cope?

Yes. Live sessions are evenings/weekends; recordings & lifetime LMS keep you on track.

Do I need coding background?

No. We start at zero and let AI handle heavy lifting while you learn logic.

How soon can I expect a salary hike?

Alumni typically secure interviews after career phase

Ready to Lead in the **Age of AI?**

In a world where AI is replacing tasks, companies are now paying more to those who know how to use it.

If you're stuck in the same job title, same salary, same routine...
This program isn't just about learning AI — it's about reinventing your career
